

WORLD POLYMER
IML FOOD PACKAGING SOLUTIONS

What Does IML Container Mean?

IML containers are plastic food packages that have the label built into them during the manufacturing process—not added later like a sticker. This means the label and the container are one piece. The result is a strong, good-looking container with a label that doesn't peel off and can be fully recycled.

About Us

Be part of the 2026 International Exhibitions with World-Polymer, showcasing the latest innovations in IML food packaging solutions.

WORLD POLYMER
IML FOOD PACKAGING SOLUTIONS

Our Vision

01

To present packaged food products to people throughout the world in the most hygienic, appealing and secure form within the framework of environmental sustainability.

Our Mission

02

We provide our customers with food packaging solutions that will be a great advantage among their competitors with an innovative, customer focused and environmentally sensitive approach.

03

Our Values

- Being People Focused
- Operating within the Framework of a Total Quality Approach
- Thinking Globally
- Being Respectful to the Environment

Rectangular IML Container

Optimized shapes that maximize shelf space and packing efficiency, ideal for compact products like processed meals and bakery items.

Product Information:

Shape : Rectangle

Material: PP

Volume: 300 MM

WP-108

Body inner box Qty: 532

Lid inner box Qty: 1302

WP-106

Body inner box Qty: 532

Lid inner box Qty: 1302

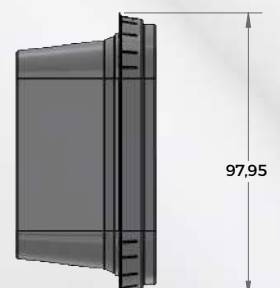

Space Efficient

It uses less space for storage & transport.

Versatile

Preferred by many food businesses for meal prep & takeout

Oval IML Container

Combining aesthetics and practicality, oval containers stand out on shelves while providing ergonomic benefits for users.

Product Information:

Shape : Oval

Material: PP

Volume: 100 MM, 200 MM, 400 MM

WP-104

Body inner box Qty: 532

Lid inner box Qty: 1302

WP-102

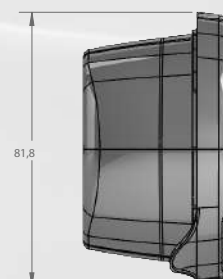

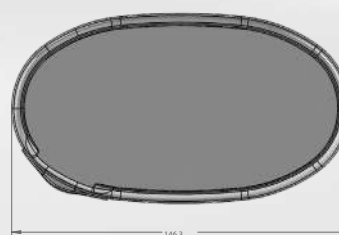

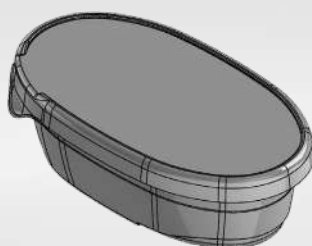

Body inner box Qty: 532

Lid inner box Qty: 1302

WP-107

Body inner box Qty: 532

Lid inner box Qty: 1302

Oval IML

Blending modern design with everyday functionality, oval containers enhance shelf appeal while ensuring comfortable handling and efficient storage.

Aesthetic Appeal

Premium look for gourmet & specialty foods

Better Handling

Comfortable grip for on-the-go consumption

Round IML Container

A classic, versatile shape perfect for dairy products like yogurt, ice cream, cheese, and desserts, designed for easy handling

Product Information:

Shape : Round

Material: PP

Volume: 500 MM, 1000 MM

WP-111

Body inner box Qty: 216

Lid inner box Qty: 1320

WP-110

Body inner box Qty: 360

Lid inner box Qty: 2200

Strong Structure

Even distribution of pressure prevents cracking

Leak Prevention

Circular edges reduce weak points for sealing

Easy Scooping

Great for soups, yogurts, and dips

Choosing the Right Size for Your Product

Package size is a key factor in meeting consumer needs, supporting portion control, and promoting packaging sustainability.

World Polymer's extensive range offers a variety of sizes, enabling customers to choose the most suitable packaging for their products and market requirements

Why IML Containers Stand Out

Choosing World Polymer IML containers means choosing innovation, quality, and sustainability.

We combine advanced in-mold labeling technology with recyclable polypropylene (PP) to create durable, vibrant, and eco-friendly packaging. Our integrated labeling eliminates peeling and secondary processes, reducing costs and supporting a circular economy.

With customizable shapes, sizes, and closures, World Polymer delivers smart packaging solutions that elevate your brand and meet global market demands.

Continuity

Sustainable Raw Materials

World Polymer Packaging uses mono-material polypropylene (PP), which is recyclable up to 100% across most global recycling systems and supports high-quality recycling processes.

Through the use of polypropylene (PP), we establish ourselves as innovators in environmentally responsible plastic packaging manufacturing.

Our dedication to integrating sustainable materials in food packaging strengthens our position as a leading company in the sustainable packaging sector.

Recyclability

The design improves recyclability by using mono-material polypropylene (PP), a plastic that is fully recyclable and environmentally friendly

Our packaging relies on mono-material structures, which help enhance recycling performance and support sustainable packaging solutions

Reusability

At World Polymer, we support reusability by developing strong, long-lasting plastic packaging that enables multiple usage cycles.

Our eco-design philosophy incorporates advanced manufacturing methods that encourage extended product life, including refillable containers and modular packaging solutions.

Why IML Containers Stand Out

Choosing World Polymer IML containers means choosing innovation, quality, and sustainability.

We combine advanced in-mold labeling technology with recyclable polypropylene (PP) to create durable, vibrant, and eco-friendly packaging. Our integrated labeling eliminates peeling and secondary processes, reducing costs and supporting a circular economy.

With customizable shapes, sizes, and closures, World Polymer delivers smart packaging solutions that elevate your brand and meet global market demands.

Resource Efficiency

Resource efficiency is our priority.

World Polymer promotes responsible operations by minimizing plastic waste through optimized, sustainable manufacturing processes. We reduce environmental impact by improving packaging efficiency, using fewer materials, and supporting sustainability through our R&D efforts to protect the environment.

The Future of Sustainable Packaging

Sustainable packaging is driving the shift toward eco-friendly, recyclable solutions to reduce plastic pollution and meet rising consumer expectations.

At World Polymer, we are committed to delivering innovative, environmentally responsible plastic packaging—building a smarter, more sustainable future together.

Empty Packaging

A Sustainable Choice

Our packaging reduces residues, improving recycling efficiency while lowering energy use and costs.

Circular Economy

At World Polymer, we support the circular economy through closed-loop recycling and fully recyclable packaging, using renewable materials to build a more sustainable future.
